Get to know your role.

At Verizon, there are three different levels of online access for managing your account online: Account Owner, Account Manager and Account Member. Check out the differences between them below.

Account Owners: In this role, you're financially responsible for the entire account. You'll have complete access to all the info, and you can also manage all mobile phones on the account. There can only be one registered Account Owner.

Account Managers: As an Account Manager, you can access account info and manage all lines of service on the account. Your Account Owner can assign up to 3 different Account Managers at a time.

Account Members: If you're simply a user on your account, you're considered an Account Member. This means you have access to info and certain functions for your specific line but aren't able to access sensitive billing information or make plan changes.

Role Access	Owner	Manager	Member

Customer Proprietary Network Information Settings

Verizon shares customer information within our family of companies for a variety of purposes, including, for example, providing you with the latest information about our products and services and offering you our latest promotions. You can limit the sharing of certain types of customer information, known as Customer Proprietary Network Information, or CPNI, within the Verizon family of companies for marketing services to you different from your current services.

Customer Proprietary Network Information (CPNI) is information that relates to the type, quantity, destination, technical configuration, location, amount of use and related billing information of your telecommunications or interconnected Voice over Internet Protocol (VoIP) services. Federal law governs our use and sharing of CPNI.

Do you want to share your CPNI?

Business & Marketing Insights

The Business and Marketing Insights program combines and analyzes customer information in a way that does not identify you personally. The program uses information about how you use your mobile device including web addresses of sites you visit and similar information about apps and features you use, and information about the location of your device, as well as certain information about your Verizon products and services (such as device type) and information we obtain from other companies (such as gender, age range, and interests) or that you provide. We may use information provided by business and marketing clients who want us to develop aggregate insights about their own customers.

Business and Marketing Insights may be used by Verizon and others who want to better understand customer actions in aggregate. For example, a company could find it valuable to understand the number of customers in different age groups who visited a website, used an app, or visited a retail store or stadium.

Verizon may share location information that does not identify you personally with certain other companies to allow them to produce limited business and marketing insights. For example, de-identified location information we provide could be combined with similar information provided by other wireless carriers to create traffic reports.

See our Frequently Asked Questions for more information.

You have a choice about whether your information is used in the Business and Marketing Insights program.

May we use your information for Business and Marketing Insights?

Use Don't use

Relevant Mobile Advertising

Verizon's Relevant Mobile Advertising program helps make the ads you see more interesting and useful. This program shares information with Oath (formed by the combination of AOL and Yahoo).

The Relevant Mobile Advertising program uses your postal and email addresses, certain information about your Verizon products and services (such as device type), and information that you provide or we get from other companies (such as gender, age range, and interests). This information may be combined with information collected by Oath advertising services on devices you use to access Oath services and visit third-party websites and apps that include Oath advertising services (such as web browsing, app usage, and location), as well as information that we obtain from third-party partners and advertisers.

We do not share information that identifies you personally in this program outside of Verizon other than with vendors and partners who do work for us. We require that these vendors and partners protect the information and use it only for the services they are providing us.

The program uses online and device identifiers, including browser cookies, ad IDs from Apple and Google, and one created by Verizon, known as a Unique Identifier Header or UIDH. Unless you opt out of the Relevant Mobile Advertising program and have not opted in to the separate Verizon Selects program, a UIDH will be included in the address information of internet requests going to Verizon companies (including Oath) and to a small number of partners to help deliver services unrelated to advertising. Verizon partners are authorized to use the Verizon identifier only as part of Verizon and Oath services. More information is available about the Relevant Mobile Advertising program and the UIDH.

You have a choice about whether to participate. If you opt out of Relevant Mobile Advertising and you have not joined the Verizon Selects program, Verizon will stop including a UIDH in traffic coming from your device. The UIDH will still appear for a short period of time after you opt out. If you are a member of Verizon Selects, the UIDH will still be present even if you opt out of Relevant Mobile Advertising.

You also have choices about how Oath uses information for advertising purposes.

Do you want to participate in Relevant Mobile Advertising?

Relevant Mobile Advertising
Verizon's Relevant Mobile Advertising program helps make the ads you see more interesting and useful. This program shares information with Oath (formed by the combination of AOL and Yahoo).

The Relevant Mobile Advertising program uses your postal and email addresses, certain information about your Verizon products and services (such as device type), and information that you provide or we get from other companies (such as gender, age range, and interests). This information may be combined with information collected by Oath advertising services on devices you use to access Oath services and visit third-party websites and apps that include Oath advertising services (such as web browsing, app usage, and location), as well as information that we obtain from third-party partners and advertisers.

We do not share information that identifies you personally in this program outside of Verizon other than with vendors and partners who do work for us. We require that these vendors and partners protect the information and use it only for the services they are providing us.

The program uses online and device identifiers, including browser cookies, ad IDs from Apple and Google, and one created by Verizon, known as a Unique Identifier Header or UIDH. Unless you opt out of the Relevant Mobile Advertising program and have not opted in to the separate Verizon Selects program, a UIDH will be included in the address information of internet requests going to Verizon companies (including Oath) and to a small number of partners to help deliver services unrelated to advertising. Verizon partners are authorized to use the Verizon identifier only as part of Verizon and Oath services. More information is available about the Relevant Mobile Advertising program and the UIDH.

You have a choice about whether to participate. If you opt out of Relevant Mobile Advertising and you have not joined the Verizon Selects program, Verizon will stop including a UIDH in traffic coming from your device. The UIDH will still appear for a short period of time after you opt out. If you are a member of Verizon Selects, the UIDH will still be present even if you opt out of Relevant Mobile Advertising.

You also have choices about how Oath uses information for advertising purposes.

Verizon partners are authorized to use the Verizon identifier only as part of Verizon and Oath services. More information is available about the Relevant Mobile Advertising program and the UIDH.

You have a choice about whether to participate. If you opt out of Relevant Mobile Advertising and you have not joined the Verizon Selects program, Verizon will stop including a UIDH in traffic coming from your device. The UIDH will still appear for a short period of time after you opt out. If you are a member of Verizon Selects, the UIDH will still be present even if you opt out of Relevant Mobile Advertising.

You also have choices about how Oath uses information for advertising purposes.

Account Access Roles

Verizon Wireless provides three different levels of online access to help you manage your account online: Account Owner, Account Manager, and Account Member. See below for an overview of each role and a list of functions that are available for each.

Account Owner
The Account Owner is the person financially responsible for the account. This role has complete access to all of the information and can manage all mobile phones on the account. Only one mobile phone number per account is eligible to register as an Account Owner.

Account Manager
The Account Manager must be assigned by the Account Owner. This role has access to account information and can manage all lines of service on the account. The Account Owner can assign up to 3 Account Managers.

Account Member
The Account Member is a user on the Account Owner's account. This role has access to certain individual mobile number information and functions, but does not have access to sensitive billing information. All mobile numbers on the account are eligible to register as an Account Member.

See the details of each role's capabilities below.

Role Access	Owner	Manager	Member
